Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Discover & Assess	Stage 2 Use & Get Insights	Stage 3 Act & Optimize
Actions <i>What does the customer do?</i>	- User visits OptiCrop platform via web/app - Registers or logs in - Inputs farm details (location, crop type, soil info) - Requests AI-based crop recommendations	- Receives personalized crop suggestions - Views crop-suitability score & insights - Explores weather forecast, soil health & market trends - Uses resources (fertilizer, irrigation, best practices)	- Implements recommended actions on the farm - Monitors crop progress using dashboard - Gets alerts & advisory updates - Reviews results & plans for next season
Touchpoint <i>What part of the service do they interact with?</i>	- Landing page / Sign up page - Onboarding flow - Farm details form - AI recommendation request button	- Dashboard – Recommendations - Weather & soil data section - Market trends & resource hub - Articles, guides & videos	- Farm monitoring dashboard - Alerts & notifications - Advisory & tips section - Reports & performance summary
Customer Thought <i>What is the customer thinking?</i>	“What crops are best for my land this season?” “Is this platform easy to use and reliable?” “Will this really help me improve my yield?”	“These insights are very useful for my farm.” “The recommendations match my conditions.” “I feel more confident in planning my crops.”	“The suggestions are helping my crop grow better.” “I can track and manage my farm easily.” “I’ll keep using OptiCrop for better results.”
Process Ownership <i>Who is in the lead on this?</i>	- Farmer / User - OptiCrop Registration System - Data Collection Module	- AI Recommendation Engine - Analytics & Dashboard Module - Weather & Soil Data Services	- Farmer / User - Monitoring & Alert System - Advisory & Support Team
Opportunities <i>How can we improve this stage?</i>	- Simplify registration process - Add multilingual support - Provide guided onboarding tutorials	- Improve recommendation accuracy - Add real-time data updates - Offer personalized learning resources	- Enable automated farm alerts - Provide predictive yield analysis - Add community support and expert consultation
